

Raffaello CrioComfort)))

THE HIGHEST EXPRESSION OF TECHNOLOGY

 **Benelli**
piú avanti da sempre

This is the only patent able to offer superior shooting performance in terms of absorbing recoil, muzzle climb, alignment and better aiming for successive shots. A weight less than 3 kg and a 47% reduction in recoil are the characteristics, unequaled by the competition, which complete the full Comfort system.

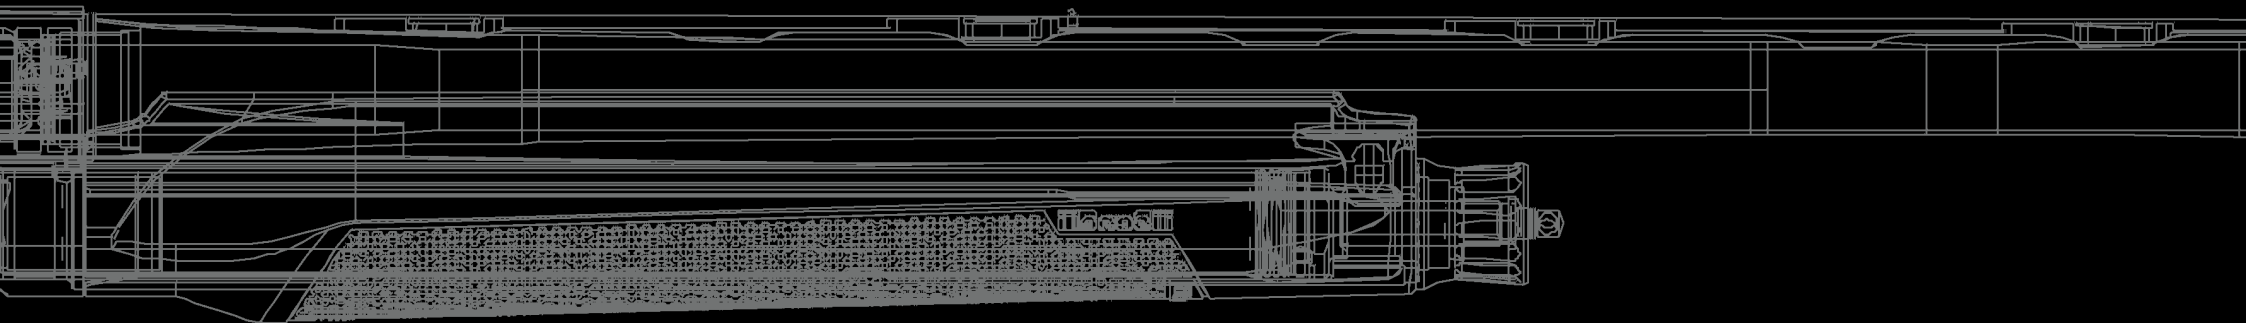

ERGONOMICS

The Comfort stock is designed to absorb and contain the shock of the shot before it arrives to the shooter's shoulder, offering comfort and absolute control of the arm.

STYLE

The simple, flowing lines of the Raffaello model define the design of the receiver, highlighting the refined elegance and beauty of CrioComfort. An unmistakable style.

SAFETY

The innovative Window System patent makes it possible to see the cartridges in the magazine through a slot inside the fore-end, with immediate advantages in terms of safety and functionality in any situation.

PRECISION

The interchangeable rib in carbon fiber ensures lightness, manageability and non-deformability when exposed to heat. The cryogenic barrels and chokes ensure superior performance in terms of stability, firing precision and wear resistance.

INSTINCT

The brand-new high-sight in fluorescent fiber optics and the extended dimension facilitates instinctive aiming and guarantees greater visibility even with poor light.
